

# TANDEMLOC INC

Industry-Standard • Custom Designed and Manufactured

**TANDEMLOC, Inc. provides engineered and manufacturing solutions** for unique applications pertaining to lifting, securing and mobilizing of containers and other items. Over the years, we have designed thousands of products.

**Our roots date back to the 1950's**, when the shipping world began using the newly developed cargo container to carry cargo around the world. The intermodal industry was born and we designed all kinds of tie downs and lifters specifically for cargo containers. Our understanding of "the container" soon led us to servicing the needs of the unique uses of these Containers, which remains one of our primary areas of focus today.

**Our problem-solving background** in the container lifting business enabled us to service another market, "Below the Hook Lifters" for general industry. Over the years, we have developed a huge selection of general-purpose spreader bars, lifting beams and frames of all shapes and sizes. We also design and build special purpose, proprietary lifters.

## Container Connectors and Tie Downs

- Container-to-Container Twistlocks
- Special Purpose Twistlocks
- Container-to-Trailer Twistlocks
- Container Connector Clamps
- Container Corner Fittings
- ISO-Mil Standard 209 Tie Down Combos
